Front End Developer

Job description:

We are looking for an experienced front-end developer to join our team and help us build web applications for Trading and Risk Management Systems. The ideal candidate should have experience in developing responsive and user-friendly interfaces using Svelte or other frameworks like React. You will work closely with our product and engineering teams to deliver high-quality solutions that meet our clients' needs.

Responsibilities:

Develop high-quality user interfaces for web applications using Svelte or other frameworks like React.

Collaborate with our product and engineering teams to define user requirements and design solutions that meet our clients' needs.

Participate in code reviews, testing, and debugging to ensure high-quality, bug-free code.

Stay up-to-date with the latest front-end development trends and technologies and propose new approaches to improve our development processes and product offerings.

Provide guidance and mentorship to junior team members as needed.
